The Ultimate Solution for Reliable Liquid Handling

Embark on a journey of unparalleled liquid handling performance with the AHN Tecan® Type Robotic Tips. Meticulously designed, produced and validated, these tips have been crafted to deliver nothing short of exceptional results when paired with LiHa® Arms.

With their superior straightness and low coefficient of variation, you can trust these tips to provide you with the utmost accuracy and precision.

Whether you're working with the Freedom EVO®100, 150, or 200 with Liquid Handling Arm, or the Freedom EVO®75 8+1, when it comes to automated liquid handling, nothing surpasses the AHN Robotic Tips for Tecan®.

PP

Made of premium-grade virgin polypropylene for durability and reliability

Choose from carbon-embedded conductive tips or clear tips

Manufactured in ISO-certified 9001 and 13485, 100K clean room facility to meet the very highest quality standards

Polyethylene filter effectively prevents aerosol contamination

Validated on the actual instrument for which the tip is created, to ensure seamless integration

Made from USP class VI resins and certified free of Endotoxin, Heavy Metals, RNase, DNase and DNA free

Colour-coded polycarbonate tray allows you to quickly identify different volumes

Pick from non-sterile, sterile and filtered sterile formats, depending on your application

Available in blister packs and eco-friendly flip card box

Trust in our exceptional quality to ensure flawless liquid handling in your laboratory and experience the reliability and precision of AHN Tecan® Type Robotic Tips for yourself.
