ahn my Tube PCR

Optical measurement - high transparency of PCR strips allows the use for applications where the optical qPCR signal comes from the bottom of the tubes

Reduced cycle time and optimal heat transfer - guaranteed by extra thin, uniform wall thickness of tube

Low-binding - reducing the adhesion of proteins to the very minimum

Sterile handling - each lot is manufactured under strict sterile conditions

Versions - available as 0.1 and 0.2 mL PCR strip tubes, without caps or with attached caps / both 0.1 and 0.2 mL PCR strip tubes, without caps can be covered by the strip of 8 caps (cat. no. 3-035-01-0)

Compatibility - the 0.1 mL strips are especially recommended for fast thermocyclers requiring low profile tubes and the 0.2 mL strips for the

standard thermocyclers requiring regular profile tubes / compatibility available chart request
