## ahn my Tube PCR

**Optical measurement** - high transparency of PCR strips allows the use for applications where the optical qPCR signal comes from the bottom of the tubes

**Reduced cycle time and optimal heat transfer** - guaranteed by extra thin, uniform wall thickness of tube

**Low-binding** - reducing the adhesion of proteins to the very minimum **Sterile handling** - each lot is manufactured under strict sterile conditions

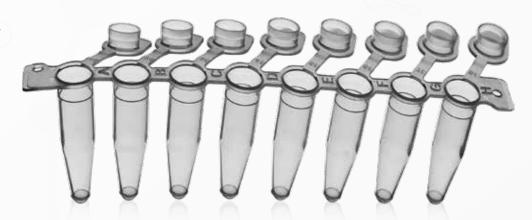

**Versions** - available as 0.1 and 0.2 mL PCR strip tubes, without caps or with attached caps / both 0.1 and 0.2 mL PCR strip tubes, without caps can be covered by the strip of 8 caps (cat. no. 3-035-01-0)

**Compatibility** - the 0.1 mL strips are especially recommended for fast thermocyclers requiring low profile tubes and the 0.2 mL strips for the

standard thermocyclers requiring regular profile tubes / compatibility chart available on request
