## Analogue Magnetic Stirrer with Heating

**Usage** - mixing reagents in research laboratories, schools and universities, chemical and pharmaceutical companies

**High heat capacity** - exceptionally high temperature maximum of 320°C with even temperature distribution across the plate surface

**Maximum Speed** - quiet servo DC motor with granular speed control ranging from 500 rpm to 2200 rpm

**Large plate capacity** - set-up plate accommodates a range of containers up to a maximum capacity of 10L

**Stable operation** - even weight distribution and rubberized feet for stable benchtop operation

**Space efficient design** - lightweight chassis (1.4 kg) and compact size that can fit in space-restricted settings such as hoods, cabinets and cold rooms

Durable material construction - corrosion-resistant, ceramic-coated set-up plates and IP21 compliant design for extended durability
