Deep Well Plates

Contaminant-free - manufactured in a class 100K cleanroom facility and certified free of contaminants including anthropogenic/non-anthropogenic DNA, DNases, RNases, and endotoxins.

Fully autoclavable - thermostable up to 121°C, AHN myPlate® deep well plates are autoclave-ready for easy sterilisation and decontamination after use. They are safe for use in high-temperature protocols up to 121°C.

Freezer-ready - with excellent low temperature stability, AHN myPlate® deep well plates can be used for sample and reagent storage in refrigerators and freezers. They are safe for use on low temperatures up to a limit of -80°C.

Alphanumeric sample index - feature an intuitive, inefaceable sample index that is embossed onto the plate. Sample well index consists of an alphanumeric code that makes it easy to locate each sample well

ANSI compliant - designed to comply with relevant ANSI standards, including ANSI/SLAS standards for microplate dimensions. This ensures universal compatibility with all standardised robotic liquid handling platforms.

Easy stacking - each plate features a base conformation that allows for easy stacking to minimise space uptake on the workbench or freezer or refrigerator storage.

Raised-rim design - designed to minimise cross-contamination across sample wells, all variants of AHN myPlate® deep well plates feature a subtle raised-rim design around the opening of each well.
